

Bio-Sel-E

Biotin with vitamin E - Selenium

Vitamin and trace mineral are of utmost importance to maximize the ability of the poultry to express its genetic potential of growth and reproduction. They play an important role in a wide range of metabolic activities by way of acting as a cofactor in the intermediary metabolism. Normal diet gives a bare minimum amount required to maintain normal metabolism without given disease symptoms or deficiencies. However, today's modern poultry and intensive farming practices demand higher metabolic rates for best performance and livability. Bio-Sel-E is designed precisely to fulfil these demands by supplementing Biotin (Vit H), Selenium and Vitamin E three most crucial cofactors in a balance proportion.

COMPOSITION:

Active Ingredients	Each gm Contains
Biotin (Vit H)	20 mcg
Selenium	200 mcg
Vitamin E	200 mg
Carrier	Q.S.
(appropriate overages added)	

UNIQUE FEATURES:

- Activate immune system and give good immune response after vaccination.
- Increase fertility and reduce embryonic mortality.
- Market impact on general health and growth.
- Elevate natural resistance power (racial vigor) of bird.
- Help in preventing dermatitis.
- Protect from or correct encephalomalacia, exudative diathesis, muscular myopathies & acute death syndrome
- Increase fertility and reduce embryonic mortality.

DIRECTION FOR USE:

Breeder : 10 gm / 50 birds through water or 300 gm/ton of feed.

Layer : 5 gm for 200 birds through water or 150-250 gm/ton of feed.

Broiler : 5 gm / 50 birds through water.

or as directed by the Nutritionist/Veterinarian.

PACKING: 100 gm Sachet and 500 gm pot.
