

eXtra-minP

For better production

Extra-minP is a time tested casein hydrolysate based liquid feed supplement which offers all essential as well as nonessential amino acids to the poultry. For conversion of dietary proteins into body proteins (i.e. in the process of anabolism) presence of all essential amino acids is very crucial. Protein synthesis in the body gets interrupted if

any single essential amino acid is missing. Casein hydrolysate in Extra-minP is one of the most balanced source of essential amino acids. Extra-minP improve the amino acids profile to ensure better utilization and conversion of dietary proteins into body proteins.
