

# NUTRIBION®

ENHANCES POULTRY PRODUCTIVITY

EFFECTIVE PHYTOGENIC POULTRY FEED SUPPLEMENT BASED ON  
**THE SCIENCE OF LIFE ENERGY**

FORMULATED BY

POULTRY FEED SUPPLEMENT

Marketed in Bangladesh by

## Reduction in Feed Cost = Improved Poultry Profitability

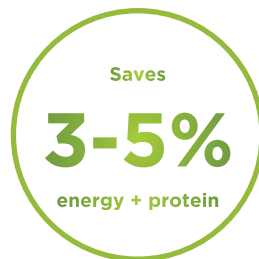

Managing Feed Cost is the most important aspect in Poultry Business Profitability. Today's feed is highly dense, very rich in energy, amino acids and carbohydrates. In spite of such dense feed, some feed ingredients have less digestible values and high anti-nutritionals. This affects the daily weight gain and lowers the feed efficiency.

**NOBLE LIFESCIENCE, SINGAPORE** has formulated **NUTRIBION** to help the farmer economize the feed cost, based on the breakthrough Science of Life Energy proven through extensive research trials and field application.

### Benefits of Nutribion

- Improves nutrient absorption by improving feed digestion and assimilation at the cellular level.
- Improves the availability of energy, protein, fat & amino acids for better weight gain at lower feed cost
- Improves protein and carbohydrate utilization by 3-5%
- Improves feed biochemistry
- Maintains uniformity of the flock
- Improves egg production in layers and breeders.
- Helps optimise the feed formulation (our technical experts can guide you through the process.)

#### FOR BROILERS

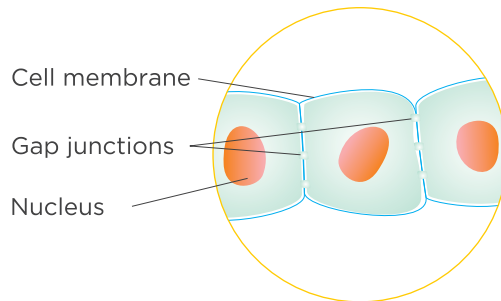

#### FOR LAYERS & BREEDERS

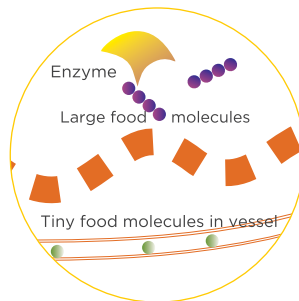

## Mode of action

- Nutribion improves functioning of epithelial tissue thus improving the digestive process.
- It energizes enzyme secretion from digestive tract in the body.
- It regulates intestinal motility which helps in better absorption of digested nutrients.
- Its unique metabolic action helps in the assimilation of absorbed nutrients at cellular level in the body mainly by improving inter and intra cellular activity.

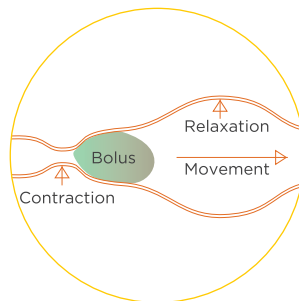

1

**Improves the permeability of epithelial tissue of intestine** (phytogenic extracts of convallamarin, oleic acid and myristic acid )

2

**Improves digestive enzyme secretion from liver, gall bladder and pancreas** (phytogenic extracts of alfalfa - carotene and isoflavones, adonin and acotinic acid )

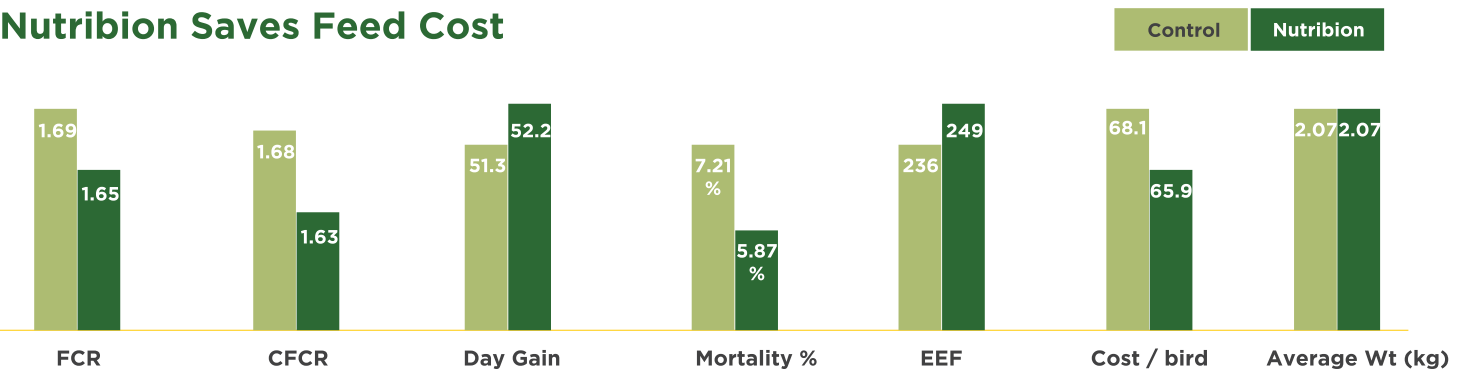

3

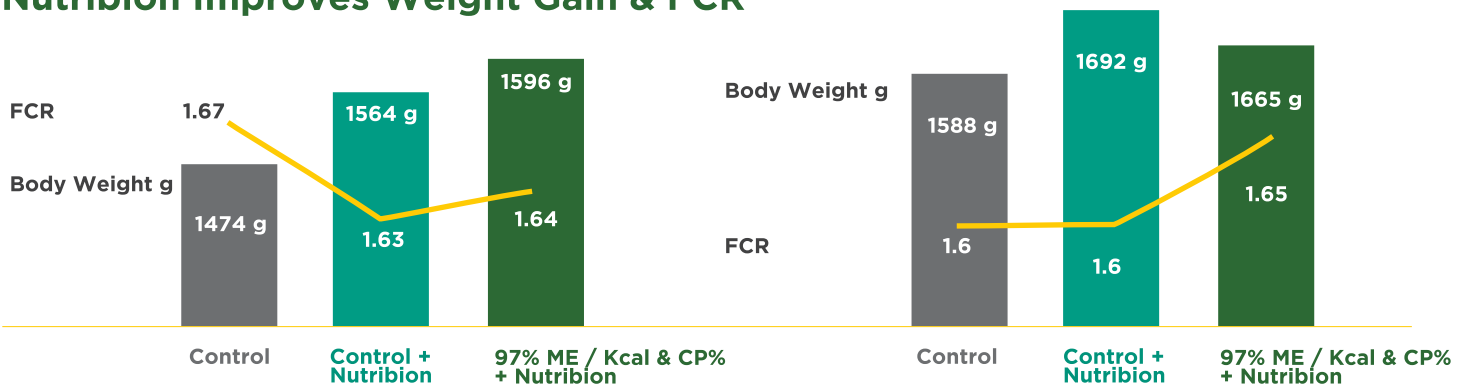

**Improves intestinal motility helping in digestion and assimilation** (phytogenic extracts of convallarin)

**Formulated using** Phytogenic extracts containing Adonin, Isoflavones, Convallamarin, Carotene. Fortified with natural vitamins and minerals.

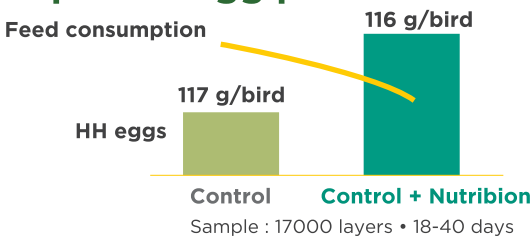

Nutribion Saves Feed Cost

Nutribion Improves Weight Gain & FCR

Improves egg production

Observations & Conclusions

- Improvement in FCR by about 0.01 - 0.05 points
- Increase in body weight of 1 - 1.5g/day
- Reduction in feed cost, feed with less oil is possible

Application

- Nutribion can be used to top-up the feed for better FCR and productivity.
- By using its matrix, it can be applied as feed cost economizer.

Usage

In feed **300g - 500g** per MT of feed OR as directed by the nutritionist

Packsize

5 kg
